

UNIVERSITY ADMIT ELIGIBILITY PREDICTOR

Defining the problem statement:

1. The Students a way to verify is a eligibility of the student to join courses.
2. Admins can log in to enter College Cut-off lists. Admins do not get a Registration page, their login details are directly entered in the database.
3. Users register in the system from the registration link on the index page. All the details required about the user are collected on the registration page.
4. Upon Log-in the Users entered details are displayed and the colleges along with its complete details he/she can get into.
