Project Design Phase-II Technology Stack (Architecture &Stack)

Team ID	IBM-Project-42692-1660705650
Project Name	University Admit Eligibility Predictor
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

Guidelines:

- 1. Include all the processes (As an application logic / Technology Block)
- 2. Provide infrastructural demarcation (Local / Cloud)
- 3. Indicate external interfaces (third party API's etc.)
- 4. Indicate Data Storage components / services
- 5. Indicate interface to machine learning models (if applicable)

Technical Architecture:

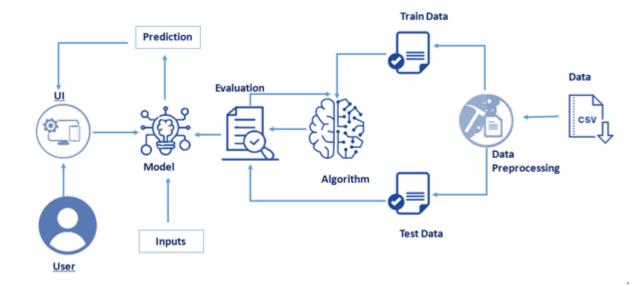

Table-1: Components & Technologies:

S. No	Component	Description	Technology
1.	User Interface	How user interacts with application e.g. Web UI, Mobile App, Chat bot etc.	HTML, JavaScript, Angular JS, CSS, React JS etc.
2.	Application Logic-1	Logic for a process in the application	Python/Java
3.	Application Logic-2	Logic for a process in the	IBM Watson STT service

		application		
4	Application Logic-3	Logic for a process in the	IBM Watson Assistant	
		application		
5.	Database	Data Type, Configurations etc. NOSQL,MYSQL etc		
6.	Cloud Database	Database Service on Cloud	vice on Cloud IBM Cloudant ,IBM DB2 etc.	
7.	File Storage	File storage requirements	IBM Block Storage or Other	
			Storage Service or Local File	
			System	
8.	External API-1	Purpose of External API used in	IBM Weather API, etc.	
		the application		
9.	External API-2	Purpose of External API used in	Aadhar API, etc	
		the application		
10.	Machine Learning Model	Purpose of Machine Learning	Object Recognition Model, etc	
		Model		
11.	Infrastructure (Server / Cloud)	Application Deployment on	Local, Cloud Foundry,	
		Local System / Cloud Local	Kubenetes, etc.	
		Server Configuration:		
		Cloud Server Configuration		

Table-2: Application Characteristics:

S. No	Characteristics	Description	Technology
1.	Open-Source	List the open-source	Technology of Open
	Frameworks	frameworks used	Source framework
S. No	Characteristics	Description	Technology
2.	Security	List all the security /	e.g. SHA-256,
	Implementations	access controls	Encryptions, IAM
		implemented, use of	Controls, OWASP etc.
		firewalls etc.	
3.	Scalable Architecture	Justify the scalability of	Technology used
		architecture (3 – tier,	
		Micro-services)	
4.	Availability	Justify the availability	Technology used
		of application (e.g. use	
		of load balancers,	
		distributed servers etc.)	
5.	Performance	Design consideration	Technology used
		for the performance of	
		the application (number	
		of requests per sec, use	
		of Cache, use of	
		CDN's) etc.
